ASSOCIATION TO PROMOTE SCIENTIFIC CULTURE  
AND SUPPORT SCIENTIFIC WORK

## “SCIENCE AND KNOWLEDGE”

- *What does it mean that “wonder is the only path to knowledge”?*
- *How does scientific knowledge relate to other forms of knowledge?*
- *Broadening reason when doing scientific research.....is it possible?*

**Saturday, September 28th, 2013 -  
Catholic University, Washington DC**

*The gaze of science thus benefits from faith:  
faith encourages the scientist to remain constantly  
open to reality in all its inexhaustible richness.  
Faith awakens the critical sense by preventing  
research from being satisfied with its own formulae  
and helps it to realize that nature is always greater.  
By stimulating wonder before the  
profound mystery of creation, faith broadens the  
horizons of reason to shed greater light on the  
world which discloses itself to scientific investigation.  
(Benedict XVI)*
